

# API Portland Limestone

High quality natural limestone for architectural masonry, cladding and paving

# API PORTLAND LIMESTONE

API Stone Ltd, in conjunction with Albion Stone plc, offers this high quality British limestone from the quarries on the Isle of Portland in Dorset, England. API Stone Ltd stock various sized slabs and can provide ashlar cladding, walling, flooring, paving and bespoke carving commissions.

API Stone Ltd is the North UK stockist for all Portland stones including:

- Jordan's and Bowers Basebed.
- Jordan's, Bowers and New Fancy Beach Whitbeds.
- Bowers Roach.

The production facilities at Albion Stone plc are among the most technically advanced in the UK. This made them the obvious choice for API Stone Ltd to partner with for prestigious materials and projects.

API Stone Ltd stock various sized slabs and transform them into ashlar cladding, walling, flooring, paving and bespoke carving commissions.

Even though Portland limestone is a relatively new addition to the API Stone Ltd product range, we currently have a number of high profile projects under our belt:

- St. Johns corner, Liverpool Limestreet.
- Fitzroy Square, London.

Portland stone has been used in landmark architecture for centuries. The list of high quality references for this stone includes Buckingham Palace and St Paul's cathedral.

## CASE STUDY

*St. Johns Shopping Centre,  
Liverpool*

API Stone Ltd were asked to supply Portland stone for the St. Johns shopping centre façade on Liverpool Limestreet.

The brief was simple from the town planners: high quality Portland stone specified and Jordan's Basebed selected.

API Stone Ltd sampled and worked with the main contractor and masonry company that were nominated to construct the new fascia.

API Stone Ltd worked to extremely tight schedules and converted raw slab for the whole project (in excess of 320 square metres) and delivered it to site in fourteen weeks in time for the shopping centre to open for Christmas 2014.

Working with the main contractors Graham Construction and Powell Masonry (Wigan), the project was completed on time and successfully, and is proving an excellent reference for API Stone Ltd and their new product.
